***Examiner's Amendment***

Authorization for this examiner's amendment was given in a telephone interview with Michael Goldman on or about October 10, 2003.

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

In claims 42, 43, 48 and 49, line 1, --host-- has been inserted before "cell" .

In claims 45, 46, 51 and 52, line 1, "said" preceding evaluation" has been replaced with --the--.

In claim 41, line 7, and in claim 47, line 5, --in vitro-- has been inserted after "host cell".

Art Unit: 1635

The following is an examiner's statement of reasons for allowance: The claimed invention is free of the prior art of record because the prior art of record does not teach or fairly suggest a method for screening a chemical agent for the ability to modify sodium channel function in a host cell in vitro comprising introducing an isolated nucleic acid molecule encoding a voltage sensitive sodium channel of *Musca domestica* of SEQ ID No. 1 or 2, or a nucleic acid molecule that hybridizes to SEQ ID No. 1 or 2 at 42°C, with 5 X SSPC and 50% formamide with washing at 65°C with 0.5 X SSPC, and optionally introducing a second nucleic acid molecule encoding a tip E protein, expressing the molecules encoded by the introduced the nucleic acid molecules, exposing the host cell to a chemical agent, and evaluating the exposed host cell to determine if the chemical agent modifies the function of the voltage sensitive sodium channel.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
